# Meeting the challeng of sustainable design

Featuring AIA/COTE Top 10 Winning Projects

Ecology, Architecture, and Planning

"Daniel Williams's Sustainable Design is ... a thoroughly practical call for the design professions to take the next steps toward transformation of the human prospect toward a future that is sustainable and sustaining of the best in human life lived in partnership not domination."

-From the Foreword by David W. Orr, the Paul Sears Distinguished Professor of Environmental Studies and Politics and Chair of the Environmental Studies Program at Oberlin College

"In this pioneering book, Daniel Williams provides the sort of intelligent, thoughtful, experienced insights that-if followed-will ensure that we make the right choices. It should be on the desk of every architect in the world."

-Denis Hayes, president and CEO of the Bullitt Foundation and coordinator of the first Earth Day in 1970

Architects identify "sustainability" as the most important change in the future of their profession. Sustainable Design: Ecology, Architecture, and Planning is a practical, comprehensive guide to design and plan a built environment compatible with the region's economic, social, and ecological patterns.

In this book, Daniel Williams challenges professionals to rethink architecture and to see their projects not as objects but as critical, connected pieces of the whole, essential to human health as well as to

regional economy and ecology. Comprehensive in scope, Sustainable Design answers key questions such as:

- How do I begin thinking and designing ecologically?
- What is the difference between "green design" and "sustainable design"?
- What are some examples of effective change I can make that will have the most impact for the least cost?

Written for architects, planners, landscape architects, engineers, public officials, and change agent professionals, this important resource defines the issues of sustainable design, illustrates conceptual and case studies, and provides support for continued learning in this increasingly central focus of architects' and urban planners' work.

Williams's book features winning projects from the first decade of the AIA's Committee on the Environment (COTE) Top Ten award program.

Daniel E. Williams, FAIA

Forewords by David W. Orr and Donald R. Watson, FAIA

# **Contents:**

Foreword by David W. Orr Foreword by Donald Watson, FAIA Preface Acknowledgments Introduction

# Part 1

# **CHAPTER ONE: The Ecological Model**

Ecology Ecology as a Model Waste Debts The Value of Land Paradigm Shift Thinking as a System: Connectivity, Not Fragmentation

# **CHAPTER TWO: Sustainable Design**

Where Do We Want to Go?

Design Matters

Why Architects?

- Green Design versus Sustainable Design
- Why Now?

Approaching Sustainability

Place-Based Energy and Resources

Principles for Designing Sustainably

Where to Start?

# **CHAPTER THREE: Regional Design**

Evolving from Nonrenewables

Another Weak Link: The Power Grid

The Regional Design

Water: A Common Denominator

Make No Small Plans

The Regional Design Process

Regional Case Studies:

Cache Valley, Utah

- Farmington, Minnesota: Building within the Community Watershed
- Smart Growth: Southeast Florida Coastal Communities

# CHAPTER FOUR: Sustainable Urban and Community Design

A Matter of Place

Principles for Sustainable Communities

Regional Ecology and Biourbanism

Sustainable Urban and Community Case Studies:

- Lessons from Belle Glade: Can We Save the Everglades and Sustain Agriculture?
- Rio Nuevo Master Plan
- Growing the Great River Park

# **CHAPTER FIVE: Architectural Design**

The Site: Challenges and Opportunities Site Design and Environmental Analysis Sustainable Infrastructure

# The Skin

Evolving a Sustainable Design Practice Sustainable Design and Existing Buildings Sustainable Interior Architecture

# Part 2

# CHAPTER SIX: The AIA/COTE Top Ten Green

Projects Program

1997 AIA/COTE Top Ten Green Projects 1998 AIA/COTE Top Ten Green Projects 1999 AIA/COTE Top Ten Green Projects 2000 AIA/COTE Top Ten Green Projects 2002 AIA/COTE Top Ten Green Projects 2003 AIA/COTE Top Ten Green Projects 2004 AIA/COTE Top Ten Green Projects 2005 AIA/COTE Top Ten Green Projects 2006 AIA/COTE Top Ten Green Projects 2006 AIA/COTE Top Ten Green Projects Afterword Sustainability Terms Bibliography

# About the Author:

**Daniel E. Williams, FAIA**, a Seattle-based architect and urban planner, is a nationally recognized expert in sustainable architecture and planning. Williams was the 2003 chair of the AIA's Committee on the Environment (COTE), and he chaired the AIA Sustainable Task Group in 2006. His projects, which range from residences to regional plans, connect ecology, economic development, transportation, agriculture, education, and natural resource protection.
